(54) Title: NAVIGATION TAGS

(57) Abstract: The invention relates to method for navigating within a navigation area (2), wherein a plurality of navigation tags (1) has been mounted at predetermined positions within the navigation area (2). To solve the object of the invention to provide a method and system for accurate and flexible navigating in various types of navigation scenarios, it is proposed that the method comprises the steps of: determining a sequence of navigation tags (1), which are associated with a desired route within the navigation area (2), based on the positions of the navigation tags (7) and on topographic information (8) on the navigation area (2); and navigating said route by passing navigation tags (1) of said sequence of navigation tags, whereby passing of a navigation tag is acknowledged (12, 13). The invention further relates to a system and a computer program product for navigating within a navigation area (2).

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
